Arrange the given sentences into a well-structured paragraph by ordering them from 01 - 05 accordingly.

In consuming countries, cocoa is an important ingredient in the confectionery, and food and beverage industries, and, more recently, in the pharmaceutical and cosmetics industries.

02 ▼

Cocoa is of significant economic importance both for producing and consuming countries. For producing countries, it generates export revenues, income and employment.

01 ▼

For most of these people, cocoa constitutes the main, if not only, source of cash income.

04 ▼

Furthermore, globally, cocoa is produced by six million farmers, and contributes to the livelihoods of 40 to 50 million people (WCF, 2012).

03 ▼

In Côte d'Ivoire and Ghana, for example, this commodity accounted for more than 30 per cent of export earnings over the period 1995-2014.

The truck did not really have to pull the Space Shuttle once it overcame rolling resistance and got moving.

Choose... ▾

Nobody wants a runaway Space Shuttle. So, the route was planned very carefully. The best speed for the Space Shuttle to travel was determined to be only 2 miles per hour.

Choose... ▾

Rolling resistance is the energy that was lost from the tires on the SPMT (the Self-Propelled Modular Transporter which carried the Shuttle) as they experienced friction and gravity as they moved down the street.

Choose... ▾

The Space Shuttle has so much mass and is so heavy that it builds up a tremendous amount of momentum when going downhill, which makes it very difficult to stop. Momentum = mass x velocity.

Choose... ▾

There were two big challenges for a Toyota Tundra truck to be able to move the Space Shuttle down the street. One was controlling rolling resistance and the other one was avoiding going up and down hills.

A study (Taubert et al. 2007) into the body's response to the low consumption of cocoa found that these health benefits are comparable to those achieved through the use of conventional blood pressure medicine.

Chocolate has been shown to improve cardiovascular health. Cocoa, from which chocolate is made, contains flavonoids.

When blood pressure is lowered, there is a reduced risk of health problems such as stroke and coronary heart disease.

Therefore, research indicates that small amounts of chocolate can indeed offer heart health benefits.

The main flavonoids present in cocoa have been shown to relax blood vessels and lower blood pressure (Stresing 2004).
